Embedded Training- Powered By POTENT

ARM-7

Confidential: eNex

Session	Modules
Introductory Session	<ul style="list-style-type: none"> ➤ Embedded System Development Process ➤ Introduction to Microchip PIC Microcontrollers and features of the LPC214X family of microcontrollers ➤ Text Editors/Compilers/Programmers/ Development tools/IDE ➤ Introduction to Embedded C
Practical Session I	<ul style="list-style-type: none"> ➤ Oscillators and Power supply ➤ Two pin and Four pin Crystal Oscillators ➤ Clock Divider Circuit
Practical Session II	<ul style="list-style-type: none"> ➤ Enabling LED Connected to Port of LPC2148 ➤ LED Flasher ➤ Interfacing of Seven segment Display with LPC2148 using Multiplexing technique. ➤ Interfacing a 16 Characters X 2 Rows Backlit LCD. ➤ Interfacing Graphic LCD.
Practical Session III	<ul style="list-style-type: none"> ➤ Key Switch Connection to LPC2148.
Practical Session IV	<ul style="list-style-type: none"> ➤ Audio Buzzer interface with LPC2148.
Practical Session V	<ul style="list-style-type: none"> ➤ Controlling an Electromagnetic Relay.
Practical Session VI	<ul style="list-style-type: none"> ➤ RS232 Serial Communication with PC and LPC2148 Microcontroller. ➤ USB Communication with PC Using LPC2148.
Practical Session VII	<ul style="list-style-type: none"> ➤ Inter-Integrated Circuit Bus (I2C Bus) Programming using EEPROM. ➤ I2C EEPROM interfacing with LPC2148 ➤ I2C RTC(Real Time Clock) interfacing with LPC2148 or ARM ➤ Inter-Integrated Circuit Bus (I2C Bus) Programming using RTC.
Practical Session VIII	<ul style="list-style-type: none"> ➤ Analog to Digital Conversion using on-chip ADC with 12-bit resolution. ➤ Digital to Analog Conversion using on-chip ADC with 12-bit resolution.
Practical Session IX	<ul style="list-style-type: none"> ➤ Serial Peripheral Interface (SPI) using 12 Bit ADC MCP3202 to LPC2148.
Practical Session X	<ul style="list-style-type: none"> ➤ PWM Generation using LPC2148 Microcontroller.
Practical Session XI	<ul style="list-style-type: none"> ➤ Interfacing With RF Module.
Practical Session XII	<ul style="list-style-type: none"> ➤ Interfacing With GSM Module.
Course Material	<ul style="list-style-type: none"> ➤ Soft copy of the Data sheets, Circuit Diagrams, Source Code & IDE are provided in CD-ROM. Development tools – LPC2148

Course Duration : 4 Weeks/48-Hours

Eligibility : Degree/Diploma in EEE/ECE/IT/EI

Course Fee :

Batch Size :
